**Re: SR 162 Watermain Replacement Project
Water shutdown scheduled for Tuesday, February 17, 2026**

Dear Property Owner,

The letter is intended to notify the affected property owners of a water shutdown on Tuesday, February 17th from 7:30am – 7:30pm as part of the SR 162 Watermain Replacement Project. Water will be off for much of that duration. The Contractor will be completing the tie in for the newly installed watermain along SR 162 on February 17th. We anticipate that this will complete the tie in for customers located on this new section of watermain.

Once the water service is restored, significant flushing will follow. District crews will work to flush air (which can look like milky water) and discolored water from all pipelines. Customers should refrain from using hot water until all flushing has been completed so as not to draw any sediment into their water heaters (cold water should be OK). Customers directly impacted by this water shutdown will get additional reminder notifications by Phone Message and email. Please make sure the District has updated contact information on your account if you would like to receive these messages. The District will also provide updates on the District Website at (www.valleywaterdistrict.com).

If you have any additional questions or concerns regarding this project, please contact the District office at 253-841-9698 or service@valleywaterdistrict.com .

Thank you

Sean Vance
General Manager
