Re: Alderwood Watermain and Service Line Replacement Project
Initial Water shutdown scheduled for September 17th 8:00am – 3:30pm

Dear Property Owner,

The Alderwood Watermain and Service Line Replacement Project began at the end of July and is now at the point where it is necessary to complete the first tie in for the newly installed watermain. This initial water shutdown is scheduled for Wednesday, September 17th from 8am – 3:30pm. Water will be off for much of that duration.

Once the water service is restored, significant flushing will follow. District crews will work to flush air (which can look like milky water) and discolored water from all pipelines. Customers should refrain from using hot water until all flushing has been completed so as not to draw any sediment into their water heaters (cold water should be OK).

A second shutdown similar in duration (affecting the same customers) will be necessary as well. The date for this second shutdown is still to be determined. The District will provide at least 48 hours notice prior to the second shutdown.

If you have any additional questions or concerns regarding this project, please contact the District office at 253-841-9698 or service@valleywaterdistrict.com

Thank you

Sean Vance
General Manager
